

A BEGINNER'S GUIDE TO AUTISM SPECTRUM DISORDER

What does receiving a diagnosis of ASD mean?
What are "Autistic Traits" and how do they impact people's lives?
What does the future hold for a person with this condition?

Our workshop is designed for anyone with a new personal interest in the subject (e.g., recently diagnosed / carers / family) and is free to these members of the public. Informal and interactive discussions, led by an individual diagnosed with ASD, provide insight into the realities of living with the condition.
